

STEREO MOC Status Report
Time Period: 2010:235 - 2010:241

STEREO Ahead (STA) Status:

1. The following Ground System anomalies occurred during this reporting period:

- None.

2. The following spacecraft/instrument events occurred during this week:

- The average daily SSR playback volume for Ahead was 5.0 Gbits during this week.

STEREO Behind (STB) Status:

1. The following Ground System anomalies occurred during this reporting period:

- On day 236, DSS 15 was declared red before the start of the scheduled support at 1850z. The support was switched to DSS 26 for a duration of 2.1 hours, vice the scheduled seven hours. This resulted in the loss of 290 minutes of telemetry, tracking, and commanding data, and several hours of SECCHI SSR data. See DR# G110475 for more information.
- On day 240, during the DSS 55 support, turbo decoder lock was lost briefly at 1939z. This resulted in the loss of 40 frames of instrument SSR data. A DR has been requested.

2. The following spacecraft/instrument events occurred during this week:

- The average daily SSR playback volume for Behind was 5.0 Gbits during this week.
